- REST APIs
- Redux

LANGUAGES

- English (Fluent)
- Danish (Intermediate)
- Russian (Native)

HOBBIES

- Puzzles
- Video games
- Board games
- Quizes
- Yoga

PROFILE

Moving to another country inspired me to consider a career change. While working part-time and completing Danish language courses, I explored my long-standing interest in IT.

I've already finished Front-End part of the Professional Retraining Programme, now I'm now beginning to advance my skills in back-end development, focusing on Node.js, Express, and databases

PROJECTS

XR-Place Landing page

Front-End Developer (React, TS)

- A hackathon where my team developed a website for a company specializing in 3D apartment layouts. The project was built using React and involved integrating external APIs, which allowed me to demonstrate my ability to collaborate effectively and deliver functional solutions under tight deadlines.

Mesto

Front-End Developer (JS)

- This educational project is an interactive web page called "Mesto," where users can add, like, and delete photos.
- This project demonstrates proficiency in modern JavaScript practices, including modularization, DOM manipulation, API integration, and frontend build tools.

Stellar Burgers

Front-End Developer (TS)

- I implemented routing with React Router and set up protected and dynamic routes. I integrated global state management using Redux, connecting it to key pages.
- I developed an authentication mechanism to ensure secure user access and protected the personal account route for authorized users.

PREVIOUS WORK EXPERIENCE

Working part-time after relocation to Denmark (Zara, Cafe Phenix, Denmark)	2021 - 2025
Online English Tutor (for Russian students, Russia)	2018 - 2020
Client Service Specialist (Construction Company - Renovation of St.Petersburg, Russia)	2017 - 2018
